

PDMP and Appriss Webinar Q&A 9.11.19

Question: Why is there a monthly charge to eprescribe as it is state mandated? We already use EFORSCE in the state of Florida and were told not to put these reports in the patient's chart.

Answer:

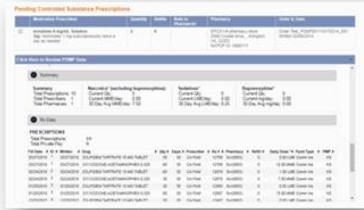

Part 1:

The charges presented on the webinar are not for e-prescribing. These charges are from APPRISS for EHR Integration. TRIARQ does not charge customers for building the integration. We would defer to APPRISS regarding justification for the yearly charge.

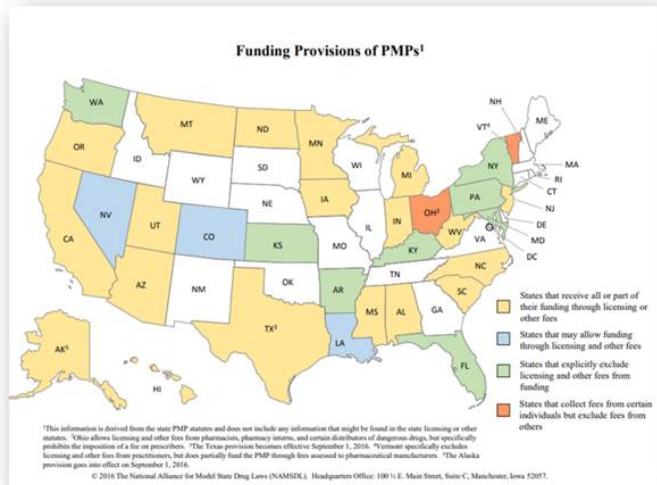

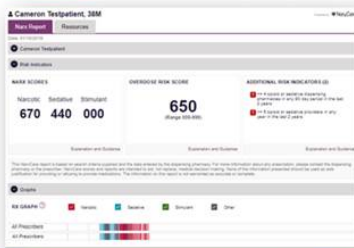

SOME STATES FUND PMP AND/OR NARXCARE

Pre-funded in some states (covers provider annual license fee)

- \$50 PMP Gateway Integration (Basic PMP Report)

- \$300 NarxCare (Advanced Analytics)

Part 2:

Thank you for the valuable feedback regarding EFORSCE directive to NOT file the report in the patient record. You can control this in the admin settings if you do not wish to store the image. You would also NOT select **Send to DMS** while reviewing the report.
