PI 2023 – e-Prescribing

Measure Details

Measure Description: At least one permissible prescription written by the MIPS eligible clinician is transmitted electronically using CEHRT.

Numerator: The number of prescriptions in the denominator generated and transmitted electronically using CEHRT.

Quick Guide

Denominator: Number of prescriptions written for drugs requiring a prescription in order to be dispensed other than controlled substances during the performance period; or number of prescriptions written for drugs requiring a prescription in order to be dispensed during the performance period.

Scoring Information

- Required for PI Performance Category Score: Yes
- Measure Score: Up to 10 points
- Eligible Bonus: No

Exclusions: Any MIPS eligible clinician who writes fewer than 100 permissible prescriptions during the performance period.

Definitions

Prescription: The authorization by a MIPS eligible clinician to a pharmacist to dispense a drug that the pharmacist would not dispense to the patient without such authorization.

Permissible Prescriptions: All drugs meeting the current definition of a prescription as the authorization by a clinician to dispense a drug that would not be dispensed without such authorization and may include electronic prescriptions of controlled substances where creation of an electronic prescription for the medication is feasible using CEHRT and where allowable by state and local law.

Set Up

Enable Drug Formulary:

- 1. Open QEMR Admin
- 2. Click Settings from left side bar

3. Click Surescript Settings tab
